TITLE: Multi-purpose file having wide range of uses - has inner leaves
equipped with overlapping transparent plastic pockets and side strips for
annotation

INVENTOR: ROBLES TENORIO, C

PATENT-ASSIGNEE: ROBLES TENORIO C[TENOI]

PRIORITY-DATA: 1993MX-0000161 (June 30, 1993) ,

ABSTRACTED-PUB-NO: FR 2707558A

BASIC-ABSTRACT: The file consists of a cover made from front and back panels and a spine (3), and a series of inner leaves which are fixed to the inside of the spine. Each of the leaves is covered on both faces by a series of overlapping pockets (18), leaving a blank strip down the side of each leaf adjacent to the pockets for annotation and for providing a secret compartment. Each of the inner leaves is attached solidly to the inner surface of the file's spine by a dielectric, electronic, thermo-dielectric, thermic, thermo-electronic or other welding process, using a dielectric or ultrasound machine. The front and back covers and spine of the file have inner reinforcing layers (7) made from compacted wood fibre or other natural or synthetic products, with an adjacent layer (6) of foam rubber and outer and inner covering layers (5,8) of fabric, vinyl or simulated leather. The pockets in the file are made from a transparent plastic such as polypropylene, regenerated cellulose, or PVC, open along one or both sides.

ADVANTAGE - Wide range of uses and substantial capacity for different contents.

CHOSEN-DRAWING: Dwg.2/8
